Page 81	Paragraph 6.79	<p>Amend Paragraph as follows:</p> <p>6.79 Planning authorities are encouraged to focus on area or site-specific opportunities in setting local targets for reducing carbon dioxide emissions, based on an understanding of the local potential for renewable or low-carbon energy and existing or planned decentralised energy infrastructure, such as CHP<sup>22</sup> or CCHP<sup>23</sup> networks to serve new development.</p>	To address representation submitted by GLA (BP6/079)
Page 82	Paragraph 6.84	<p>Amend and split Paragraph as follows:</p> <p>6.84 London Plan Policy 4A.5 requires Boroughs to identify and safeguard existing heating and cooling networks and to maximise the opportunities for providing new networks supplied by decentralised energy. All new developments should be designed to connect to existing heating and cooling networks. <del>Under</del> Policy 4A.6 <u>requires</u> all developments are <del>required</del> to demonstrate that their heating, cooling and power systems have been selected to minimise carbon dioxide emissions. <u>Developments should evaluate CCHP and CHP systems and where a new CCHP/CHP system is installed as part of a new development, examine opportunities to extend the scheme beyond the site boundary to adjacent areas.</u></p> <p><u>6.85</u> Policy 4A.7 sets a presumption that developments will achieve a reduction in carbon dioxide emissions of at least 20% from on site renewables. Policy 4A.3 requires developments to meet the highest standards of sustainable design and construction and identifies a range of measures to be addressed. The 'essential' and 'preferred' standards set out in the Mayor's SPG<sup>1</sup> are currently being reviewed to reflect updated London Plan policies and the Code for Sustainable Homes.</p>	To address representation submitted by GLA (BP6/079)
